SUBJECT: NEW FACTORY RESETTING
PROCEDURE WITHOUT RESETTING
PLUG FOR DSC/TELEX MODEM PCP 717.

SKANTI has the pleasure to introduce a new revised Resetting Procedure for
PCP 717 with the following software versions:

PRODUCT	SOFTWARE VERSION
• DSC 9001/9006	DU 1.17 and upwards
• TRP 1000/9000 series	DSC/Tlx. V. 4.09 and upwards

Factory resetting can now be carried out by means of dip switch 1 on switch S1.

**PCP
717**

LED V23   **Factory Reset switch
S1 dip switch no. 1**

1. Switch the equipment off.
2. Set Dip Switch 1 on S1 to ON
3. Switch the equipment on; LED V23 will flash rapidly
4. Wait for 30 seconds
5. Switch the equipment off
6. Set Dip Switch 1 on S1 to OFF
7. Switch the equipment on and reprogramme all ID numbers
