**SUBJECT:**   **NEW SOFTWARE FOR SCANSAT CG INMARSAT-C TERMINAL**

SKANTI hereby has the pleasure of introducing a new/updated software for the Scansat CG Inmarsat-C terminal.
In addition to the previous facilities in the software ver. 4.30/4.31 SKANTI has added some updates, which lead to the release of the new software ver. 5.00a/5.00b.

1. Manual selection of Distress parameters.

2. Distress Priority messages always includes a GPS position tag.

3. A Distress Button Test has been added.

4. Display of the correct date following GPS Week Number Rollover on 22 August 1999.

5. Improved message print routing to DTE and/or DCE printer.

6. Margin setup implemented in printer setup menu.

7. UTC time from built-in GPS or local time from DTE is now user selectable

Once a Scansat CG transceiver has been loaded with the new ver. 5.00a software, the software for the belonging PC 9000 must be upgrated to ver. 5.00b.
For PC 9000's below s/n 41874 the update requires new Eproms for the solid state disk.
For s/n 41874 or higher the update is performed by a flash memory installation floppy disk.

Please note that all software can be downloaded from the Skanti Home Page www.skanti.dk

For further information, kindly contact the SKANTI service department.
