

**SUBJECT: NEW TRANSCEIVER SOFTWARE FOR TRP 9500**

SKANTI has the pleasure hereby to introduce a new revised software version for the TRP 9500 MF/HF transceiver:

PCB 910 Transceiver Control Board software version 1.03

1. Remote protocol system changed to include full NMEA protocol.
2. Remote protocol system changed to allow dual control on the TU and TCU simultaneously, T-BUS/NMEA protocol type is user selectable.
3. The RF output power can now be reduced to a level specified in the Configuration Prom by means of Pin 8 'TX Inhibit' in the AUX connector when shorted to ground.
4. Pin 5 'TX Keyed' in the AUX connector enabled
5. PROG 53, built-in PEP power meter changed to continuous read out.
6. PROG 74, built-in Battery Voltage meter changed to continuous read out.
7. ALC loop made faster to reduce Tuning time.
8. Volume keys have been disabled in Intercom mode.

**Only compatible if Configuration Prom version 1.01 or later is installed.**

**Please note that all software can be downloaded from the Skanti Home Page [www.skanti.dk](http://www.skanti.dk)**

For further information, kindly contact the SKANTI service department.
